Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 06-29-2005 has been entered.

Election/Restrictions

Claims 57-63 and 65 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 08-13-2004.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 35,36,37,44-46,50-52,55 and 56 are rejected under 35 U.S.C. 102(b) as being anticipated by Greelis, et al.-5346498.

Greelis discloses a device having a shaft 63, an advancement mechanism 81,83, and an elongate element 105. The wheels have grooves for receiving the instrument as shown in fig. 12. The wheels can be driving wheels or one can be a slave wheel. The drive wheels are at the distal end of the shaft. The instrument driven by the wheels may be any elongated flexible instrument insertable through a catheter such as a guidewire which could easily puncture tissue.

Allowable Subject Matter

Claims 53 and 54 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 66-68,75-79,82-93 and 95 are allowed.

Response to Arguments

Applicant's arguments filed 06-29-2005 have been fully considered but they are not persuasive.

As pointed out above, the drive wheels are at the distal end of shaft 63 and the instrument would have the capability of puncturing tissue.
